無染棉麻裙褲 \$243

無染棉麻長袍 \$255

棉麻混紡布
成分：棉70% + 麻30%

麻的特性是堅韌，當中的劍麻更是製造航海纜索的原材料，因為它的纖維耐浸耐磨，在海水裡也不易腐爛。

麻布具有堅韌耐穿，通爽抗霉的優點。麻棉混合後，既保留麻的性格，又加入棉的特質，成為觸感柔軟、不易變形，吸濕透氣的棉麻布料。

我們選用的棉麻布料不經漂染，保留原始色澤。這個棉麻比例，讓衣服輕薄之餘，呈現自然下垂感，同時不易皺褶。

Linen/ Cotton Blended Fabric
Components: Cotton 70% + Linen 30%

Linen is a material renowned for its durability. Sisal is the strongest among all kinds of linen. Because of its toughness and resistance to deterioration in saltwater, sisal is usually used for making sailing rope.

Besides durability, linen is also mold-resistant. Garment made from cotton/linen blended fabric retain strong durability of linen and yet the softness of cotton. Garments tend to stay better in shape and breathe better than man-made material.

Our fabric comes in its natural color without any dye. Garments made in such fabric, with right ratio of cotton and linen, are light in weight and wrinkle free.

無染棉麻側排扣長衫 \$220

兩面穿圍裙 大人 \$147
小童 \$98

無染棉麻雙肩背心 \$155
